

PROGRAMMING QUESTION PAPER

Round 3 — Application Development

Time Allowed: 2 Hours 30 Minutes

Question:

Write an application for a **Railway Ticket Reservation System**. The application should have the following four functionalities:

1. Book
 2. Cancel
 3. Print booked tickets (details with summary)
 4. Print available tickets (details with summary)
-

Conditions for Booking:

There are a total of 63 berths for 63 confirmed tickets, 9 berths for 18 RAC tickets and 10 tickets in waiting-list. If the waiting-list ticket count goes above 10, print as '**No tickets available**'. The following passenger details should be obtained from the user:

1. Name
2. Age
3. Gender
4. Berth Preference

The tickets should **not** be allocated for children below age 5. However, their details should be stored. **Lower berth** should be allocated for persons whose age is above 60 and ladies with children if available. **Side-lower berths** should be allocated for RAC passengers.

Conditions for Cancelling:

Whenever a ticket is cancelled, a ticket from RAC should be **confirmed** and a waiting-list ticket should **move to RAC**.

Conditions for Printing Booked Tickets:

Print all the tickets that are filled along with the passenger details and at the end, print the **total number of tickets that are filled**.

Conditions for Printing Available Tickets:

Print all the tickets that are unoccupied and at the end, print the **total number of tickets that are unoccupied**.

ALL THE BEST !!!
